

TABLE OF CONTENTS

SECTION	Page
Introduction to Corn Production	1
How a Corn Plant Grows	3
Choosing a Corn Hybrid	7
Soil, Nutrition and Fertilizers	10
Seed Bed Preparation	24
Weed Control	28
Diseases and Disorders of Corn	30
Insects in Corn	54
Trouble-Shooting	66
Harvesting and Storage of Grain Corn	72
Corn Stover and Silage	76
Marketing Grain Corn	85
New Uses for Corn	87
Cost of Corn Production	90

LIST OF FIGURES

Figure 1.	Average accumulation of corn heat units in Manitoba	1
Figure 2.	Weekly corn water use	2
Figure 3.	Weekly water use by corn, cereal and bean crops	2
Figure 4.	Corn growth stages	3
Figure 5.	Primary parts of a corn plant	6
Figure 6.	Macro and secondary nutrient uptake and removal by a 100 bu/ac grain corn crop (Soil Fertility Guide)	12
Figure 7.	Micronutrient uptake and removal by a 100 bu/ac grain corn crop (Soil Fertility Guide)....	12
Figure 8.	Nitrogen uptake and partitioning in grain corn	13
Figure 9.	Phosphorus uptake and partitioning in grain corn	15
Figure 10.	Potassium uptake and partitioning in grain corn	16
Figure 11.	Sulphur uptake and partitioning in grain corn	16
Figure 12.	Nitrogen deficient corn versus non-deficient corn	20
Figure 13.	Phosphorus deficient corn versus non-deficient corn	20
Figure 14.	Phosphorus deficient corn as a result of corn on canola syndrome	20
Figure 15.	Phosphorus deficient corn as a result of corn on canola syndrome	20
Figure 16.	Potassium deficient corn	21
Figure 17.	Non-deficient corn versus sulphur deficient corn	21
Figure 18.	Pythium root rot on corn seedling	32
Figure 19.	Lodging of corn plants due to stalk rot damage	33
Figure 20.	Shredding of internal tissues of a corn stalk by a stalk rot pathogen	33
Figure 21.	Midseason symptoms of anthracnose stalk rot, called “top dieback”	34
Figure 22.	Anthrachnose stalk rot on mature corn stalk	34
Figure 23.	Anthrachnose stalk rot disease cycle	34
Figure 24.	Fusarium stalk rot on corn stalk	35
Figure 25.	Fusarium stalk rot disease cycle	35
Figure 26.	Corn stalk showing symptoms of diplodia stalk rot	36
Figure 27.	Corn stalk with diplodia stalk rot symptoms	36
Figure 28.	Diplodia stalk rot disease cycle	36
Figure 29.	Giberella stalk rot on interior and exterior of corn stalk	37
Figure 30.	Cross section of giberella stalk rot on corn stalk	37
Figure 31.	Giberella stalk rot disease cycle	37
Figure 32.	Giberella stalk rot	38
Figure 33.	Fusarium stalk rot	38
Figure 34.	Pythium stalk rot on corn plant	39
Figure 35.	Anthrachnose leaf blight on corn leaf	41

LIST OF FIGURES

Figure 36.	Early common rust lesions on corn leaf	42
Figure 37.	Advanced common rust lesions on corn leaf	42
Figure 38.	Common rust disease cycle	42
Figure 39.	Common smut on young corn plant	43
Figure 40.	Common smut on corn	43
Figure 41.	Head smut on corn	44
Figure 42.	Crazy top in corn	44
Figure 43.	Corn field infected with Goss's Wilt	45
Figure 44.	Leaf lesions with "freckles" and shiny exudate, distinctive of Goss's Wilt	45
Figure 45.	Goss's Wilt infection on corn leaf	45
Figure 46.	Goss's Wilt disease cycle	46
Figure 47.	Early Goss's Wilt lesions	46
Figure 48.	Advanced Goss's Wilt lesions	46
Figure 49.	Giberella ear rot	49
Figure 50.	Giberella ear rot disease cycle	49
Figure 51.	Fusarium ear rot	50
Figure 52.	Kernels infected by fusarium ear rot	50
Figure 53.	Fusarium ear rot disease cycle	50
Figure 54.	Dingy cutworms	54
Figure 55.	Redbacked cutworm and darksided cutworm	54
Figure 56.	European corn borer larva	57
Figure 57.	Wireworm larva	59
Figure 58.	Wireworm larvae	59
Figure 59.	Armyworm larva on oats	60
Figure 60.	Armyworm adult	60
Figure 61.	Corneaworm larva.....	61
Figure 62.	Corneaworm larva on sweet corn	61
Figure 63.	Seedcorn maggot and damage in bean seed	62
Figure 64.	Twospotted spider mites on soybean leaf	63
Figure 65.	Fourspotted sap beetle	64
Figure 66.	The changes of the essential elements of fermentation over time	79
Figure 67.	Milkline levels	79

LIST OF TABLES

Table 1.	Comparative growth stages using three different leaf-counting methods	5
Table 2.	Relative response of corn yield following various crops in Manitoba (1997-2001)	10
Table 3.	Soil suitability for corn according to texture in Manitoba	11
Table 4.	Average nutrient analysis of manure and the amount available for crop use the year applied	17
Table 5.	Nitrogen recommendations for corn (based on spring banded application)	18
Table 6.	Phosphorus, potassium and sulphur recommendations for corn	18
Table 7.	Soil test criteria for micronutrients	19
Table 8.	Fertilizer requirements for corn lacking a soil test	19
Table 9.	Corn seeds required per 3 metre (10 ft) row for various populations (assuming 85%of the seeds survive and produce a viable plant)	26
Table 10.	Forage buffering capacity	77
Table 11.	Effect of harvest stage on yield and quality of corn silage	79
Table 12.	Effect of cutting height on yield and forage quality of corn harvested at 75% silk	80
Table 13.	Recommended moisture contents for corn silage stored in various types of silos	81
Table 14.	Composition and estimated digestible energy (DE) content of corn silage and Certain common feedstuffs grown in Manitoba	83
Table 15.	Grades of corn (Canadian Western—Primary and export Grade Determinants)	85
